## **What is Jabra pro 930 MONO UC?**

Jabra pro 930 is a portable wireless fancy headset, which is mainly used for formal communications through computers such as Skype or audio call. This gadget is easy to use and installs instantly in no time. As you can connect it to your computers and its ready to use. It is cost effective and quite handy as every worker can easily use this gadget, this way the workers are not stuck to their desks and they can roam around. This would increase their multitasking ability. It can simply be managed through special buttons in the headset even if you are away from your working desk.

There are many different unique things that you are not aware of about this gadget. The following are:

### **1. 3 types of headset attachments**

The Jabra pro headset comes with 3 different headset attachments, which can be worn in a unique way. You can wear them as a headband, ear hook or neckband. The headband and ear hook are already available in the set. The neckband, however, can be purchased from the market. These can be adjustable according to the position a person wants it to fit.

### **2. Multi-functioning button**

This button is present on the headset. It can receive calls and disconnect them just by double tapping a button from the headset. The volume of the sounds can also be adjustable and it can also be muted.

### **3. Listen to music**

As the device is connected to the PC, so by playing music on it will directly play on the headset as well.

### **4. Effective power managing system**

**Jabra pro 930 USB MONO HEADSET** has an innate power managing features, which can sustain battery life in the long run. There is an option for auto sleep mode in the system. When this option is switched on, it enters into sleep mode for approximately for 8 hours without any activity being performed on it. This will be turned off when the headset is being hooked or

undocked to the pc. It can also power off automatically approximately after 60 minutes when there is no task performed between the headset and pc.

## **5. Cosy, flexible ear cushions**

It is important to have comfortable ear cushions, which can easily be tolerated for hours. Usually what we see that the ear cushions of most ordinary headsets are very irritating and uncomfortable. It is not easy to use such headsets, which are not able to provide good quality ear cushions because this can distract the voice from your end and the communication becomes disruptive.

## **Conclusion**

To sum up the whole discussion, [Jabra pro 930](https://www.goheadsets.com/jabra-pro-930-usb-mono-uc/) can be easily accessible through different online sites or you can buy them from retailers. They have loads of multi-function features, which are handy for a person who works. They are easy to use, portable and most importantly wireless. Every working environment should have such headsets, which would contribute more to the productivity of the work.
